

New AI Technology Helps Members Go From Good to Great

Fellow Paddle Enthusiasts,

I have a nickname for our newest technology.... "The path from good to Great!"

This game changing technology that we have available to us at Spring Brook Rackets is the Volley Trainer. An AI powered training tool that completely blows away any prior ball machine brought to the game. It is infinitely adjustable to provide you every possible ball you could receive... you can adjust the speed, depth, spin (all combinations... lefty spin, righty spin, overhands, topspin for rollers, and severe underpin). It is, by far, the most efficient way to sharpen your strokes, learn a new stroke, and read how to play every ball of the wires. I have had incredible results using it to teach players to master a new stroke, in literally, 1/10th of the time that it would take in a traditional lesson format.

Let me know if you would like to set up a time for a lesson using this trainer and you will be amazed at the acceleration of the learning curve that you will experience. Text me at 973-886-5252 if you want to start down the .. Path from Good to Great.

Jaime Ferriero
Paddle Professional

VOLLEY AT SPRING BROOK

- Worlds first AI enabled Racquet Sports training experience
- Portable ball trainer that easily rolls out onto the court
- An innovation in technology
- Has multiple computers and cameras
- Replicates real life shots
- Plays different scenarios
